

Community Energy England and Community Energy Wales proudly present 2018 Community Energy Photo Award Winner YnNi Teg

YnNi Teg are the winners of the 2018 Community Energy Photo Award which was decided by a public vote online. We looked for the original image that best captures the essence of the community energy movement. The winning photo is of the three Directors of YnNi Teg at their community-owned turbine, modelling ethical pants with the tagline 'Powered by Wind' that were to be given to all subscribers to their share offer during Community Energy Fortnight. Photo credit - Flashbulb Photography & Film. Community Energy England and Community Energy Wales congratulate YnNi Teg their now infamous photo and on everything they have achieved to date and wish them all success with future endeavours.

Community Energy England and Community Energy Wales announced the winners of the 2018 Community Energy Awards at the Arnolfini, Bristol on Friday 19th October. The awards were sponsored by Bristol City Council and Co-op Energy.

About Community Energy England

Community Energy England (CEE) represents and supports those committed to the community energy sector. Our mission is to support and accelerate the transition to a fair, low carbon and community-led energy system. To do this, we:

- Provide a single unified voice for the Community Energy sector to government, industry and press.
- Share good practice from the sector and work with innovators to support the development of new ideas.
- Bring communities, businesses, local authorities and experts together and promote partnership working.
- Work with local hubs to facilitate a supportive environment in which community energy projects can flourish.

Membership is open to any organisation which shares the association's objectives for the development of the community energy sector. Further details can be found on the CEE website www.communityenergyengland.org

About Community Energy Wales

Community Energy Wales (CEW) wants to put sustainable energy schemes at the heart of communities in Wales. Communities can become stronger, more resilient, and self-reliant by generating their own energy, using it efficiently, and directing the net income to regenerate their communities. CEW help to bring about this change by inspiring, empowering, and influencing people, policies and practices across Wales. They bring together a network of practitioners who work with and within the communities of Wales to develop renewable energy generation and energy efficiency schemes. Further details can be found on the CEW website www.communityenergywales.org.uk
