COMMUNITY ENERGY ENGLAND EVENTS

ABOUT US

Community Energy England is the only organisation dedicated to supporting and facilitating community energy organisations and the broader sector in England.

As the voice of the sector, we are uniquely positioned to lobby government and advocate on behalf of community energy organisations and the sector as a whole.

All our work is intended to help clear obstacles, create connections between practitioners and stakeholders, and facilitate the work of community energy organisations, thereby benefiting the sector as a whole. We are also there to help when issues and policy changes affect community energy organisations' ability to create and implement projects, or the status or income of community energy organisations is threatened.
