

Whilst you're supporting the planet, we're here to support you.

At OVO we're working to make energy better for people and the planet. And that's no different when it comes to PPAs. You're already giving the planet a helping hand by generating clean, green power. So let us make that choice better for you and your wallet.

Across all our PPAs you can expect the same **excellent service** - with account management from our dedicated energy generation team. Plus, we make sure you **get paid on time**, monthly, with our **simple billing** system. All with **competitive pricing**.

What is a Power Purchase Agreement (PPA)?

A PPA is a two way agreement between a renewable energy generator and OVO. As part of this agreement, OVO buys 100% of the site's exported electricity and associated REGO certificates.

Our Standard & Multi-Rate PPA

- A **fixed power** price reflective of the current wholesale market. A Single Flat Rate or Multiple Rates either per season or seasonal time of day.
- **100%** passthrough of your DUoS & TRIAD embedded benefits.
- Competitive REGO offer.

Our Extra Investment PPA

- Available to generators big and small who do not have access to government subsidy schemes.
- Your choice of a Standard or Multi-Rate PPA with 100% passthrough of all Embedded Benefits.
- With a **REGO premium added on top** to support your wallet.
Read more about our Extra Investment PPA [here](#).

Our Small Generator PPA

- A simplified all-in-one price.
- Competitive **REGO** offer.

What you get from OVO.

Better for you.

One less thing to worry about with our dedicated account management

Better for your wallet.

Get paid well, on time, and monthly for the electricity you generate.

Better for the planet.

Feel even better about that clean, green power you're producing.

Real people. Real places. Real stories.

Huckworthy Mill Hydro

The Huckworthy Mill hydro scheme in Devon combines historic infrastructure with modern technology to generate 100kW of clean energy—enough to power around 150 homes. A new fish pass ensures the project supports local biodiversity while contributing to the region's renewable energy mix.

Ambition Community Energy

One of the renewable generators on OVO's [Extra Investment PPA](#) is Ambition Community Energy (ACE). This community-owned wind turbine in Bristol powers over 3,000 homes in the local community of Lawrence Weston. All its profits are reinvested for the benefit of the people who live there.

Feed-in-Tariff (FiT) & PPAs

At OVO, we have a dedicated team that focuses on **larger-scale, commercial FiT clients**, sites that are also eligible for PPAs. Whether you're already registered with us or looking to join, our team is here to provide expert support:
