Summer Event
Birmingham, 18th June 2026

Who We Are

CEB puts clean, resilient power in the hands of the communities we serve

- Started in 2011 with solar PV investments
- Grown into home energy & retrofit advice, workshops and funding guidance
- Tackling environmental impact and social inequality

Our Solar Installations

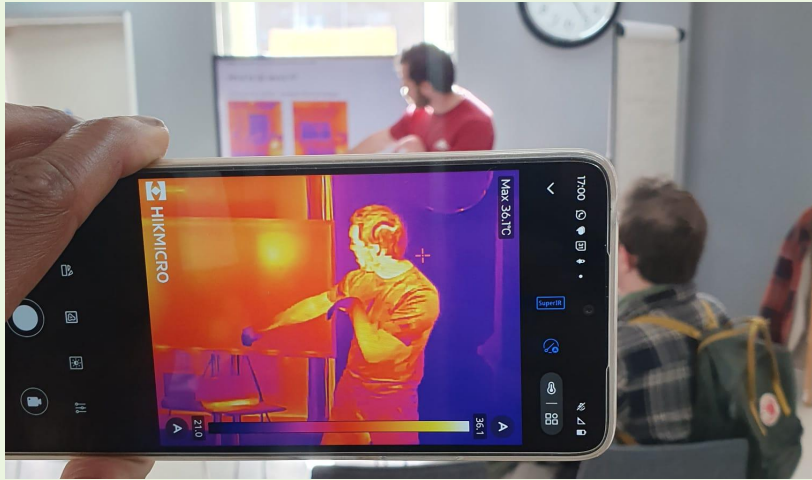

Three community-owned sites in Birmingham, delivering clean energy, every day.

Developing new projects

West Midlands
Solar Taskforce
member

Our Workshops

Seeing in Colour

Thermal imaging workshops — making heat loss visible and understand retrofit

DIY Home Energy

Practical stalls and workshops — simple, low-cost ways to insulate and improve homes.

Energy & Retrofit Advice

Personalised energy and retrofit advice, including free via grant funding

Insulation, heating & funding navigation

Birmingham hub for AECB — sustainable building network

CEB is now the Birmingham Local Hub for AECB — the sustainable building network.

Growing Through Partnerships

The task is huge - we want to grow capacity fast by working with our partners.

Big Solar Co-op

Community-funded solar at scale —
accelerating new installations across
Birmingham

Solar for Schools

Bringing solar to educational settings —
community ownership, education and
generation combined

Partnerships can be: joint delivery · knowledge sharing · outreach · workshop delivery · investment

CEB's Mid-Term Goals

1

Further Clean Energy Projects

Creating capacity for local renewable energy assets, improved efficiency and resilience whilst growing the collaborations that make an equitable energy transition

2

Extended Advice Services

Growing our energy and retrofit advice offer to reach more households

3

Trusted Project Management Advisor

Becoming the go-to advisor for the able-to-pay retrofit market in Birmingham
